

Moringa Water Treatment

Moringa seeds can be used to treat dirty water making the water clean to drink and bathe. Here are the dosage rates for how many seeds are needed per liter of water. Please see the pictures for the instructions on how to treat the dirty water.

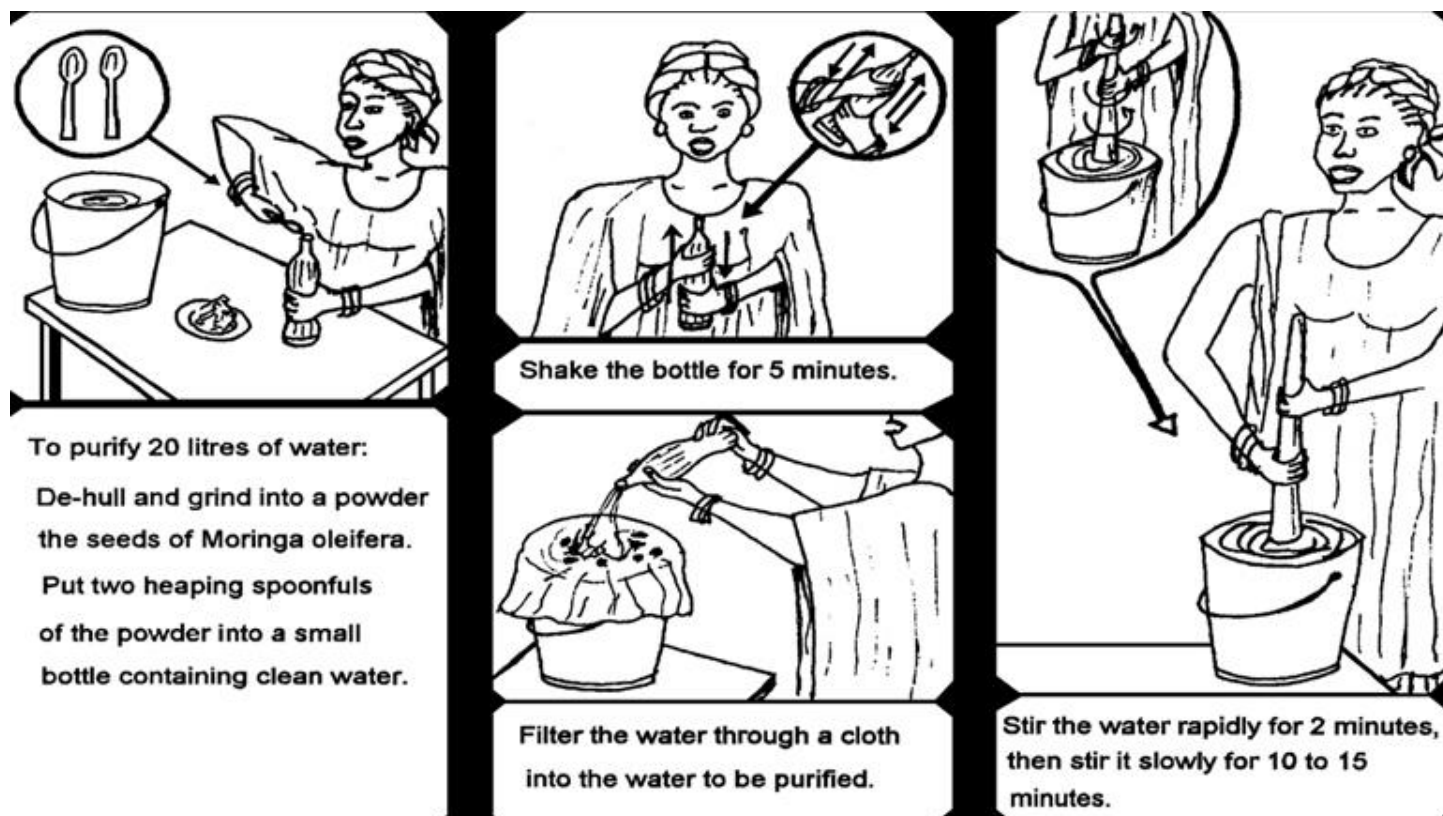

Dosage Rates:

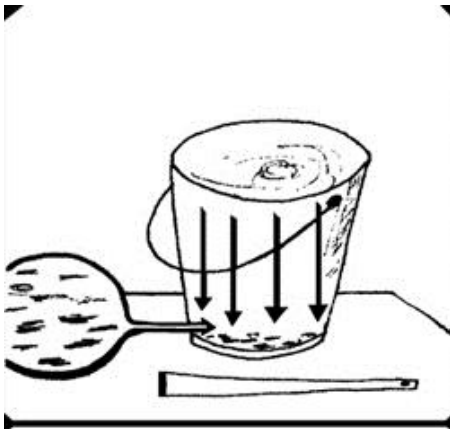

Low turbidity NTU < 50 1 seed per 4 liters (4.225 qt) water

Medium turbidity NTU 50-150 1 seed per 2 liters (2.112 qt) water

High turbidity NTU 150-250 1 seed per 1 liter (1.056 qt) water

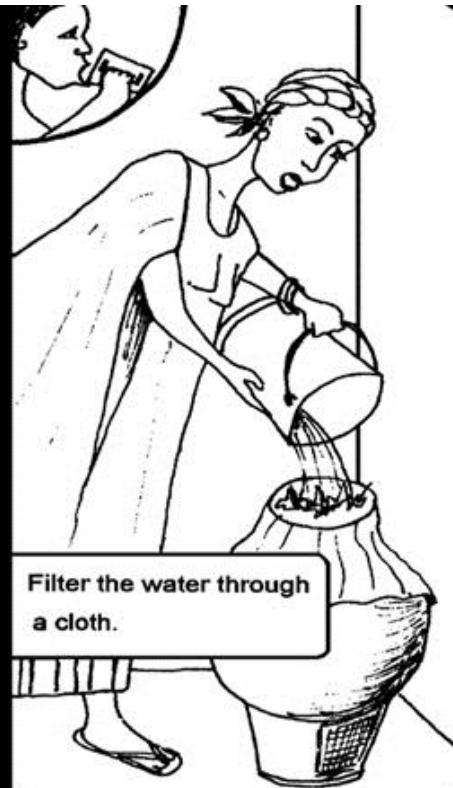

Extreme turbidity NTU > 250 2 seeds per 1 liter (1.056 qt) water

Let the bucket sit undisturbed
for an hour, or until the
water is clear.

Impurities in the water
will sink to the bottom.

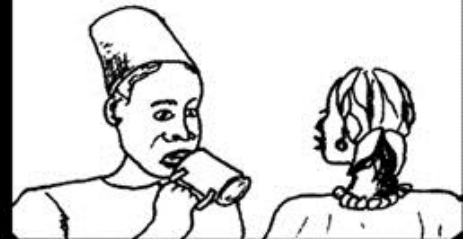

Filter the water through
a cloth.
